

DISCLOSURE UNDER BASEL III as On 30.06.2021

Banks operating in Bangladesh are maintaining capital since 1996 on the basis of risk weighted assets in line with the Basel Committee on Banking Supervision (BCBS) capital framework published in 1988. Considering present complexity and diversity in the banking industry and to make the bank's capital requirement more risk sensitive, Bangladesh Bank, being the central bank of the country has decided to adopt the Risk Based Capital Adequacy for banks in line with capital adequacy framework devised by the BCBS popularly known as 'Basel II'. Bangladesh Bank prepared a guideline to be followed by all scheduled banks from January 2009. With the above goal, under the process of Market discipline, one of the pillars of BASEL II BKB has started to disclose It's BASEL report to Bangladesh Bank from January 2013.

Basel III reforms have been made to improve the banking sector's ability to absorb shocks arising from financial and economic stress, thus reducing the risk of spillover from the financial sector to the real economy. To cope up with the international best practices and to make the bank's capital shock absorbent Regulatory Capital Framework for banks in line with Basel III came into force from January 2015.

These disclosures have been made in accordance with the Guidelines on "Risk Based Capital Adequacy (Revised Regulatory Capital Framework for banks in line with Basel III)" issued by Bangladesh Bank vide BRPD Circular No-18 of 21 December 2014. The purpose of Market discipline in the Revised Capital adequacy Framework is to complement the minimum capital requirements and the supervisory review process. The aim of disclosure is to establish more transparent and more disciplined information so that stakeholders can assess the position of the bank regarding holding of assets and to identify the risks relating to the assets and capital adequacy to meet probable loss of assets.

The Major focuses of Basel-III are:

- a) Minimum Capital Requirements to be maintained by a bank against credit, market and operational risks
- b) Raise the quality and level of capital to ensure banks are better able to absorb losses on both a going concern and a gone concern basis
- c) Raise the standards for the supervisory review process
- d) Framework of public disclosures on the positions of a bank's risk profiles, capital adequacy and risk management system

The major highlights of the Bangladesh Bank regulations regarding measurement of Risk Weighted Assets and capital requirement:

- a) To maintain Capital to Risk Weighted Assets Ratio (CRAR) at a minimum of 10 percent.
- b) To adopt the standardized approach for credit risk in relation to implementation of Basel-III.
- c) To adopt Standardized (Rule Based) Approach for market risk.
- d) To adopt Basic Indicator Approach for Operational risk.
- e) To submit the returns to Bangladesh bank on a quarterly basis.

According to Bangladesh Bank guideline on Risk Based Capital adequacy for banks, the disclosure on the websites should be made in a web page titled "Disclosure on Risk Based Capital (Basel-III)" and the link to the page should be prominently provided on the home page of the Bank's website. Each of these disclosure pertaining to a financial year should be available on the websites until disclosure of the 4th subsequent annual as on December 31, disclosure is made and here BKB has arranged to disclose It's BASEL report on 30.06.2021 (on Audited Balance Sheet) under BASEL III as per the requirement and indications of Bangladesh Bank.

This report has been articulated with the following areas:

- a. Introduction and constituents of Capital,
- b. Credit Risk,
- c. Market Risk,
- d. Operational Risk,
- e. Supervisory Review Process,
- f. Supervisory Review Evaluation Process,
- g. Market Discipline,
- h. Reporting Formats and
- i. Annexure

We hope this disclosure will be able to make the regulatory requirements more appropriate and will also assist the banks to follow the instructions more efficiently for smooth implementation of the Basel-III framework in the banking sector of Bangladesh.

Disclosure framework

The general qualitative disclosure requirements

For each separate risk area (e.g. credit, market, operational, banking book, interest rate, equity) risk, bank must describe their risk management objectives and policies, including:

- Strategies and processes,
- The structure and organization of the relevant risk management function,
- The scope and nature of risk reporting and measurement systems,
- Policies for hedging and mitigating risk and strategies /processes for monitoring the continuing effectiveness of hedges/mitigates.

The following components set out in tabular form are the disclosure requirements:

- a. Scope of application
- b. Capital structure
- c. Capital adequacy
- d. Credit risk
- e. Equities: disclosures for banking book positions
- f. Interest rate risk in the banking book (IRRBB)
- g. Market risk
- h. Operational risk
- i. Leverage Ratio
- j. Liquidity Ratio
- k. Remuneration.

Scope of application

Qualitative Disclosures	a) The name of the top corporate entity in the group to which this guideline applies.	Bangladesh Krishi Bank (100% state owned Bank).
	b) An outline of differences in the basis of consolidation for accounting and regulatory purposes, with a brief description of the entities within the group (i) that are fully consolidated; (ii) that are given a deduction treatment and (iii) that are neither consolidated nor deducted (e.g. where the investment is risk-weighted).	i) Capital to Risk-weighted Assets Ratio (CRAR) report of Bangladesh krishi Bank is submitted to Bangladesh Bank on 'Solo' basis. BKB has no subsidiary company. ii) The following items are given a deduction treatment- 1) Deferred Tax Assets iii) The accounts of the Bangladesh Krishi Bank has been solo basis. There is no deducted from the capital of BKB.
	c) Any restrictions or other major impediments on transfer of fund or regulatory capital within the group.	- Not Applicable.
Quantitative Disclosures	d) The aggregate amount of surplus capital of insurance subsidiaries (whether deducted or subjected to an alternative method) included in the capital of the consolidated group.	- Not Applicable.

Capital Structure

Qualitative Disclosures	a) Summary information on the terms and conditions of the main features of all capital instruments, especially in the case of capital instruments eligible for inclusion in Tier 1 or in Tier 2.	In terms of Section 13 of the Bank Company Act, 1991 (Amended up to 2013), the terms and conditions of the main features of all capital instruments have been segregated in terms of the eligibility criteria set forth vide BRPD Circular No. 18 dated 21 December 2014 [Guidelines on Risk Based Capital Adequacy (Revised Regulatory Capital Framework for Banks in line with Basel III)] and other relevant instructions given by Bangladesh Bank from time to time. The main features of the capital instruments are as follows: The capital of BKB can be classified into two tiers. The total regulatory capital will consist of sum of the following categories: 1. Tier 1 Capital (going-concern capital) a) Common Equity Tier 1 b) Additional Tier 1 2. Tier 2 Capital (gone-concern capital) Tier-1 capital consists of CET1 and Additional Tier 1 Capital highest quality capital items which are stable in nature and allow a bank to absorb losses on an ongoing basis. CET1 includes paid-up capital, statutory reserve, general reserve, retained earnings, minority interest in subsidiaries. Tier-2 capital lacks some of the characteristics of the core capital but also bears loss absorbing capacity to a certain extent. Tier-2 Capital consists of General Provision, Asset Revaluation Reserve, Revaluation Reserve for Securities and Revaluation Reserve for Equity Instrument and Balance of Exchange Equalization account.
Quantitative Disclosures	b) Amount of Regulatory Capital With separate Disclosure of CET- 1 Additional Tier- 1 Capital Total Tier 1 Capital Tier 2 Capital	a. The amount of Tier-1 capital, with separate disclosure of : (amount figure in crore Tk) Paid up capital ----- 900.00 Re-Capitalization----- 650.00 Statutory reserve ----- 23.23 General reserve ----- 58.81 Retained earnings ----- (11360.43) Minority interest in subsidiaries ----- 0.00 Other (if any item approved by BB) ----- 0.00 b. The total amount of Tier -2 capital ----- 226.68 General provision against UC & Off balance sheet exposure----- 226.68 Revaluation reserves (50% of fixed assets & securities and 10% of equities----- 0.00
	c) Regulatory Adjustments/Deductions from capital	Deductions from Tier -1 capital --- 0.00 Deductions from Tier -2 capital ----- 0.00
	d) Total eligible capital	Total eligible capital ----- (9501.70)

Capital Adequacy

Qualitative Disclosures	a) A summary discussion of the bank's approach for assessing the adequacy of its capital to support current and future activities	<p>With regard to regulatory capital computation approaches (minimum capital requirement) the bank is following the approach as prescribed by Bangladesh bank. Below are risk wise capital computation approaches that the bank is currently applying: Credit Risk : Standardized Approach (SA) Market Risk :Standardized Approach (SA) Operational Risk: Basic Indicator Approach (BIA).</p> <p>In parallel to business growth, the bank cannot effectively manage its capital to meet regulatory requirement considering the risk profile. Below are few highlights:</p> <p>Currently Bangladesh bank prescribed Minimum Capital to Risk Weighted Assets Ratio (CRAR) is 10% whereas as on June, 2021 the CRAR of the Bank was (-) 40.10%.</p> <p>During the same period Minimum Capital Requirement (MCR) of the bank was BDT 2369.77 crore and Eligible Capital was BDT (9501.70) crore</p>
Quantitative Disclosures	b) Capital requirement for Credit Risk	Capital requirement for Credit Risk --Tk 23523.99crore
	c) Capital requirement for Market Risk	Capital requirement for Market Risk -- Tk.53.31 crore
	d) Capital requirement for Operational Risk	Capital requirement for Operational Risk --Tk 120.41
	e) Total Capital, CET 1 Capital , Tier-1 Capital and Tier 2 capital ratio	Capital Adequacy Ratio----- - 40.10% Core Capital to RWA (Tier-1)----- - 41.05% Supplementary Capital to RWA (Tier-2) 0.96%
	f) Capital Conservation Buffer	Capital Conservation Buffer (CCB)----- 0.00%
	g) Available Capital under Pillar 2 Requirement	Could not maintain

Credit Risk

Credit risk is defined as the possibility of failure of counterparty to meet its obligation as per agreed terms. Banks are very much prone to credit risk due to its core activities i.e. lending to corporate, SME, individual. The main objects of credit risk management is to minimize the negative impact through adopting proper mitigates and also limiting credit risk exposure within acceptable limit.

Bangladesh krishi Bank follows Bangladesh Bank's BRPD circular no-14, Dated 10.09.2012 for classification of loans and advances.

Classification SL	Types of Loans	Classification Status	Period of Classification
a.	Continuous Loan -Cash credit (Hypo & Pledge)	SMA SS DF BL	3Months 3-9 Months 9-12 Months >12 Months
b.	Demand Loan -LIM -FBP -IBP	SMA SS DF BL	3Months 3-9 Months 9-12 Months >12 Months
c.	Fixed Term Loan which are repayable under a specific repayment schedule	SMA SS DF BL	8-12 Months 12-24 Months 24-36Months >36 Months
d.	Fixed Term Loan which loan amount up to 10 lac	SMA SS DF BL	8-9 Months 9-15 Months 15-18 Months >18 Months
e.	Short term Agriculture & Micro credit	SMA SS DF BL	----- 12-36 Months 36 -60Months >60 Months

Market Risk

Market risk is the risk of losses in positions arising from movements in market prices.

There is no unique classification as each classification may refer to different aspects of market risk. Nevertheless, the most commonly used types of market risk are:

- Equity risk, the risk that stock or stock indices prices or their implied volatility will change.
- Interest rate risk, the risk that interest rates or their implied volatility will change.
- Currency risk, the risk that foreign exchange rates or their implied volatility will change.
- Commodity risk, the risk that commodity prices or their implied volatility will change.

Qualitative Disclosures.	a) Views of BOD on investment activities.	-The BOD of the Bank views the ' Market Risk' as the risk to the banks earnings and Capital due to change in the market level of interest rates of securities, foreign exchange and equities as well as the volatilities of those changes.
	Methods used to measure Market Risk	-The Bank uses the standardized (Rule Based) approach to calculated market risk for trading book exposures.
	Market Risk Management system	-ALCO is the key tool for managing market risk. An ALCO is in place in the bank to administer the system.
	Policies and process for mitigating market risk	<p>-There are approved limits for loan deposit ratio, liquid assets to total assets ratio, maturity mismatch, commitments for both on and off balance sheet items, borrowing from money market, foreign exchange position and refinance from Bangladesh Bank.</p> <p>The limits are mentioned and enforced regularly to protect against market risk.</p> <p>These limits are reviewed based on prevailing market and economic conditions to minimize risk due to market fluctuation.</p>
Quantitative Disclosures	b) The capital requirements for Interest rate risk Equity position risk Foreign exchange risk Commodity risk	(amount figure in crore Tk) Tk.0.00 Tk 0.26 Tk.5.07 Tk 0.00

Operational Risk

Operational risk is the prospect of loss, resulting from inadequate or failed procedures, systems or policies, Employee errors, Systems failures, Fraud or other criminal activity.

Qualitative Disclosures	<p>a) i. Views of Board of Directors (BOD) on system to reduce Operational Risk</p> <p>ii. Performance gap of executives and staffs</p> <p>iii. Potential external events</p> <p>iv. Policies and processes for mitigating operational risk</p> <p>v. Approach for calculating capital charge for operational risk</p>	<p>The policy for operational risks including internal control and compliance risk is approved by the Board in line with the relevant guidelines of Bangladesh Bank. Audit Committee of the Board directly oversees the activities of Internal Control and Compliance Division (IC&CD) to protect against all operational risks.</p> <p>BKB has a policy to provide competitive package and best working environment to attract and retain the most talented people available in the industry. BKB's strong brand image plays an important role in employee motivation. As a result, there is no significant performance gap.</p> <p>BKB operates its business with few external risk factors relating to the socio-economic condition, political atmosphere, regulatory policy changes, natural disaster etc. based on the overall perspective of the country.</p> <p>The policy for operational risks including internal control and compliance risk is approved by the Board taking into account relevant guidelines of Bangladesh Bank.</p> <p>The Bank follows the Basic Indicator Approach (BIA) in terms of BRPD Circular No. 18 dated 21 December 2014 [Guidelines on 'risk Based capital Adequacy for Banks' (revised regulatory capital framework in line with Basel III)]. The BIA stipulates the capital charge for operational risk is a fixed percentage, denoted by α (alpha) of average positive annual gross income of the Bank over the past three years. It also states that if the annual gross income for any year is negative or zero, that should be excluded from both the numerator and denominator when calculating the average gross income. The capital charge for operational risk is enumerated by applying the following formula:</p> $K = [(GI1 + GI2 + GI3) \alpha] / n$ <p>Where: K = the capital charge under the Basic Indicator Approach GI = only positive annual gross income over the previous three years (i.e., negative or zero gross income if any shall be excluded) α = 15 percent n = number of the previous three years for which gross income is positive.</p> <p>Besides, Gross Income (GI) is calculated as "net Interest Income" plus "net non -Interest Income".</p>
Quantitative Disclosures	<p>b) The capital requirements for Operational risk</p>	<p style="text-align: right;">Tk. 120.41 crore</p>

Liquidity Ratio

Liquidity risk is the risk that a given security or asset cannot be traded quickly enough in the market to prevent a loss (or make the required profit) or when a bank is unable to fulfill its commitments in time when payment falls due. In line with the provisions of liquidity risk management under Basel III, Bangladesh Bank on the basis of the relevant guideline of Bank for International Settlements (BIS) has identified the (i) Liquidity Coverage Ratio (LCR); (ii) Net Stable Funding Ratio (NSFR); and (iii) Leverage under the purview of 'Liquidity' ratio vide BRPD Circular No. 18 dated 21 December 2014 and DOS Circular No. 1 dated 1 January 2015.

<p>Qualitative Disclosures.</p>	<p>a) Views of BOD on system to reduce liquidity Risk.</p> <p>Methods used to measure liquidity Risk.</p>	<p>- The Board of Directors reviews the liquidity risk of the Bank on half yearly rest while reviewing the half yearly Financial Statements, quarterly Stress Testing Report etc. Besides, Managing Director also reviews the liquidity position while reviewing the daily fund position. BKB has adopted the Basel III framework on liquidity standards as prescribed by Bangladesh Bank (BB) and has put in place requisite systems and processes to enable periodical computation and reporting of the Liquidity Coverage Ratio (LCR) & Net Stable Funding Ratio (NSFR). The Treasury Management Department computes the LCR & NSFR and reports LCR & NSFR to the Asset Liability Management Committee (ALCO) every month for reviewing where ALCO is chaired by the Managing Director as well as to the Risk Management Committee (Management Level). The Risk Management Committee of the board sits quarterly to discuss the overall risk scenario of the bank.</p> <p>The following methods are used to measure Liquidity risk;</p> <ul style="list-style-type: none"> Liquidity Coverage Ratio (LCR); Net Stable Funding Ratio (NSFR); Cash Reserve Ratio (CRR); Statutory Liquidity Ratio (SLR); Medium Term Funding Ratio (MTFR); Maximum Cumulative Outflow (MCO); Loan Deposit Ratio (LDR)
--	---	---

Leverage Ratio

The leverage ratio was introduced into the Basel III framework to supplement risk-based capital requirements to avoid building-up excessive on and off-balance sheet leverage in the banking system, a simple, transparent, non-risk based leverage ratio has been introduced by Bangladesh Bank.

The leverage ratio is intended to achieve the following objectives:

- a. Constrain the build-up of leverage in the banking sector which can damage the broader financial system and the economy; and
- b. Reinforce the risk based requirements with an easy to understand and a non-risk based measure.

Qualitative Disclosures	<p>a) Views of BOD on system to reduce excessive leverage</p> <p>Policies and process for managing excessive on and off balance sheet leverage-</p> <p>Approach for calculating exposure</p>	<p>In line with the BASEL III guidelines, BKB Board of Directors emphasis to improve Leverage Ratio by enhancing Tier 1 capital.</p> <p>Leverage ratio is calculated dividing the Tier 1 Capital by the total Exposure. Tier 1 Capital is calculated as per BASEL III guidelines. In the case of exposure measure, BKB includes both on balance sheet exposure and off balance sheet exposure.</p> <p>Leverage ratio is calculated dividing the Tier 1 Capital by the total Exposure. Tier 1 Capital is calculated as per BASEL III guidelines. In the case of exposure measure, BKB includes both on balance sheet exposure and off balance sheet exposure</p> <p>- Leverage ratio is calculated dividing the Tier 1 Capital by the total Exposure. The exposure measure for the leverage ratio will generally follow the accounting measure of exposure. In order to exposure consistently with financial accounts, the following will be applied by the bank.</p> <ol style="list-style-type: none"> i. On balance sheet, non derivative exposures will be net of specific provision and valuation adjustments. ii. Physical or financial collateral, guarantee or credit risk mitigation purchased is not allowed to reduce on-balance sheet exposure. iii. Netting of loans and deposit is not allowed. <p>Leverage ratio of Bank has been worked out under the Basic Indicator Approach of RBCA guidelines in Solo-Basis.</p>

Remuneration

<p>Qualitative Disclosures</p>	<p>a) Information relating to the bodies that oversee remuneration: Name, composition and mandate of the main body overseeing remuneration.</p> <p>External consultants whose advice has been sought, the body by which they were commissioned, and in what areas of the remuneration process.</p> <p>A description of the scope of the bank's remuneration policy (eg by regions, business lines), including the extent to which it is applicable to foreign subsidiaries and branches.</p> <p>A description of the types of employees considered as material risk takers and as senior managers including the number of employees in each group.</p> <p>b) Information relating to the design and structure of remuneration processes:</p> <p>i) An overview of the key features and objectives of remuneration policy.</p> <p>ii) Whether the remuneration committee reviewed the firm's remuneration policy during the past year, and if so, and an overview of any changes that were made.</p>	<p>-Bangladesh Krishi Bank, one of the state owned specialized banks operating in Bangladesh, has been playing vital role in overall agricultural financing. Being a state owned bank, the remuneration system of Bangladesh Krishi Bank is governed under National Pay Scale declared by Bangladesh Government. There is a fixation cell in the bank which works out the pay fixation as per the national pay scale in force. The remuneration process for the employees was conducted under the National Pay Scale 2015.</p> <p>- Since the bank follows the national pay scal-2015, it requires no advice with regard to the remuneration process from any external consultant and therefore, no commission to this effect is paid to any agencies.</p> <p>- There is no foreign subsidiary and branch of the bank. The remuneration policy follows uniform rule of the national pay scale and does not change due to the employees working at diversified geographical locations.</p> <p>-Usually the branch managers, regional head, divisional head and senior management of the head office are considered as the material risk takers.</p> <p>-The overall design and structure of the remuneration system of Bangladesh Krishi Bank is as per the national pay scale approved by the Government of the People's Republic of Bangladesh.</p> <p>ii) The process is reviewed only when a new national pay scale gets in force. Bangladesh Krishi Bank adopted a new pay scale which was declared by the government of People's Republic of Bangladesh on 15 December 2015 and became effective from 1 July 2015.</p>
